KAYSVILLE — Four out of five people who have had a stroke showed no apparent warning signs prior to the attack, according to Life Line Screening.

Life Line Screening will give seniors an opportunity to be screened for risks of strokes, vascular disease, irregular heart rhythms and osteoporosis all in one shot at the Autumn Glow Senior Center on Wednesday, June 3. Known as the “silent killers,” these diseases rarely show symptoms.

“The people who’ve had it before swear by it, and it does end up cheaper than going through your doctor or Medicare,” said Jacki Challis from Autumn Glow.

Seniors from Bountiful to Clinton can register for the screenings, which will include carotid artery screening, abdominal aortic aneurysm screening, peripheral arterial disease screening, osteoporosis screening and atrial fibrillation.

These screenings check for plaque built up in the arteries. Some of them will also include ultrasounds. The tests are looking for signs of silent killers, which includes blocked arteries, pain and even swelling.

Life Line Screening will set up their equipment and staff at Autumn Glow. Life Line Screening will also be setting up the appointments themselves. The screenings will cost around \$160, which is \$89 cheaper than seeing a doctor.

For more information on the screenings and to register, call 1-888-653-6441 or go to [www.lifelinescreening.com](http://www.lifelinescreening.com).
